UNIT 1 – INTRODUCTION TO DIGITAL MARKETING

Syllabus coverage
Fundamentals of Digital Marketing & its significance; Traditional Marketing vs Digital Marketing; Evolution of Digital Marketing; Digital Marketing Landscape; Key Drivers; The Digital Users in India; Digital Marketing Strategy; Consumer Decision Journey; Digital Advertising Market in India; Skills in Digital Marketing; Digital Marketing Plan.

1. Fundamentals of Digital Marketing

Definition: Digital marketing is the use of digital technologies, internet-connected platforms and online communication channels to promote products, services, brands or ideas, reach target audiences, build relationships and achieve measurable marketing objectives.

In simple words, it means **marketing through digital channels**. These channels may include websites, search engines, social media, email, mobile applications, online video, display advertisements and other digital platforms.

Core idea: Digital marketing is not merely posting on social media. It is a complete process involving audience research, strategy, content, distribution, advertising, engagement, conversion and measurement.

Major components

- **Website & landing pages:** The brand's digital destination where users can learn, compare, enquire, register or purchase.
- **Search Engine Optimization (SEO):** Improving online visibility in unpaid search results.
- **Search Engine Marketing / PPC:** Using paid search advertisements to reach people searching for relevant terms.
- **Social Media Marketing:** Using social platforms for awareness, engagement, community building and advertising.
- **Content Marketing:** Creating useful and relevant content to attract and retain a target audience.
- **Email Marketing:** Communicating with prospects/customers through targeted email campaigns.
- **Mobile Marketing:** Marketing through smartphones, apps, SMS, push notifications and mobile-first experiences.
- **Display & Video Advertising:** Visual advertisements placed across websites, apps and video platforms.
- **Analytics:** Collecting and interpreting data to understand user behaviour and campaign performance.

2. Significance of Digital Marketing

Digital marketing has become important because customers increasingly use digital devices and platforms to discover information, compare alternatives, communicate with brands and make purchase decisions.

Importance	Explanation
Wider reach	A business can communicate beyond its physical location and reach audiences across cities, regions and countries.
Targeting	Campaigns can be targeted using factors such as location, interests, demographics, behaviour and search intent.
Measurability	Impressions, clicks, engagement, leads, conversions and other performance indicators can be tracked.
Cost flexibility	Businesses can start with relatively small budgets and scale campaigns based on results.
Personalization	Messages and offers can be adapted to audience segments and user behaviour.
Real-time optimization	Campaign performance can be monitored and changes can be made while the campaign is running.
Customer engagement	Digital channels allow two-way communication through comments, messages, reviews and communities.
Data-driven decisions	Analytics provides evidence that can support marketing decisions rather than relying only on assumptions.

Exam-ready point
For a 5-mark question on significance, explain at least five points: wider reach, targeting, measurable results, cost flexibility, personalization, real-time optimization and customer engagement.

3. Traditional Marketing vs Digital Marketing

Basis	Traditional Marketing	Digital Marketing
Medium	TV, radio, newspapers, magazines, billboards, direct mail	Websites, search engines, social media, email, apps, online video and display
Communication	Mostly one-way	Can be two-way and interactive
Targeting	Usually broad or segment-based	More granular targeting is possible
Measurement	Often estimated through surveys, circulation or ratings	Detailed digital metrics can be tracked
Speed	Changes may take time	Campaigns can be launched/modified quickly
Geographical reach	Often dependent on media distribution	Potentially global
Personalization	Limited	Highly customizable by segment and behaviour
Feedback	May be delayed	Can be almost immediate
Optimization	Difficult after publication/broadcast	Creative, audience and budget can be adjusted using performance data
Example	Newspaper advertisement for a local shop	Instagram/Google campaign promoting the same shop

Traditional marketing still has value. The choice depends on the target audience, objective, budget, product and media habits. Modern businesses often use an **integrated approach** combining offline and digital channels.

4. Evolution of Digital Marketing

Digital marketing evolved alongside the internet, search engines, social platforms, smartphones, data technologies and online commerce.

Stage	Broad development	Marketing implication
Early web	Websites and basic online presence	Businesses started providing information online.
Search era	Search engines and search-based discovery grew	SEO and paid search became important.
Web 2.0	Interactive websites, blogs and user-generated content	Customers could participate and create content.
Social media era	Large-scale social platforms and online communities	Brands could engage directly with audiences.
Mobile era	Smartphones and apps became central to daily digital activity	Mobile-first marketing became essential.
Data & automation	Analytics, marketing automation, personalization and programmatic advertising developed	Campaigns became more data-driven and scalable.
Current landscape	AI-assisted content, conversational interfaces, marketer ecosystems and privacy-focused data	Marketers must combine technology, creativity, data and responsible practices.

5. Digital Marketing Landscape

The digital marketing landscape is the ecosystem of platforms, technologies, channels, audiences, content, data and processes through which digital marketing takes place.

Simple landscape model:

Audience	Channels	Activities	Measurement
Prospects, customers, communities	Search, social, email, websites, apps, video, display	Awareness → engagement → consideration → conversion → retention	Reach, traffic, engagement, leads, conversion, revenue, ret

A marketer must understand how channels work together. For example, a user may see a video, search for the brand, visit the website, read reviews, receive an email and finally make a purchase.

6. Key Drivers of Digital Marketing

- **Internet penetration:** More people online creates larger addressable audiences.
- **Smartphone adoption:** Mobile devices make digital access continuous and location-aware.
- **Social media growth:** Users spend time in communities where brands can participate.
- **E-commerce growth:** Online discovery can connect directly to online purchase.
- **Affordable digital advertising:** Platforms provide flexible bidding and budget controls.
- **Data and analytics:** Marketers can measure behaviour and outcomes.
- **Personalization:** Digital systems can tailor messages to different audience groups.
- **Content consumption:** Search, short-form video, podcasts, blogs and online communities influence decisions.
- **Technology and automation:** Automation helps scale repetitive marketing tasks and reporting.

7. Digital Users in India

India has a large and diverse digital audience. Digital usage differs by age, geography, language, income, device, connectivity and purpose. Therefore, Indian digital marketing should not assume that one message or one platform works for everyone.

Important characteristics for marketers

- Mobile-first behaviour is important because smartphones are a primary gateway to digital services.
- Multiple Indian languages create opportunities for regional and vernacular content.
- Social platforms and online video influence discovery and brand engagement.
- Digital payments and e-commerce support the movement from online discovery to transaction.
- Urban and non-urban audiences may have different content preferences and connectivity patterns.
- Young audiences are important users of social, video, gaming and creator-led content.
- Trust, reviews, price, convenience and recommendations can strongly influence online purchase decisions.

> **Teaching example**
> A local clothing business in Pune can use location-targeted social advertising, short videos in Marathi/Hindi/English, WhatsApp-based enquiries, a simple product catalogue and online payment options. The strategy should reflect the actual language and behaviour of its target customers.

8. Digital Marketing Strategy

A digital marketing strategy is a long-term framework that explains **whom to target, what objective to achieve, what value to communicate, which channels to use and how success will be measured**.

Key elements

1. **Situation analysis:** Understand the market, competitors, customers and existing digital presence.
2. **Objectives:** Set clear goals such as awareness, traffic, leads, sales or retention.
3. **Target audience:** Define customer segments and buyer personas.
4. **Value proposition:** State why customers should choose the product or service.
5. **Channel selection:** Choose search, social, email, content, display, video, etc. based on the audience and objective.

6 **Content strategy:** Decide what content to create, for whom, and at what stage of the journey.

7 **Budget and resources:** Allocate money, people, tools and time.

8 **Measurement:** Select KPIs and reporting methods.

9 **Optimization:** Test, learn and improve continuously.

9. Consumer Decision Journey

The consumer decision journey describes how a person moves from first becoming aware of a need or brand toward consideration, purchase and post-purchase behaviour.

Stage	Meaning	Typical digital touchpoints
Awareness	Consumer recognizes a need or discovers a brand	Video, social posts, display ads, search, influencer/creator content
Consideration	Consumer researches and compares options	Website, search results, reviews, blogs, product pages, comparison content
Conversion	Consumer takes the desired action	Checkout, lead form, app install, booking page, enquiry
Experience	Consumer uses the product/service	App, customer support, onboarding, email/SMS notifications
Loyalty	Satisfied customer returns and develops preference	Email, loyalty programs, personalized offers, communities
Advocacy	Customer recommends or reviews the brand	Reviews, referrals, social posts, word of mouth

A strong digital strategy supports the customer at **every stage**, not only at the purchase stage.

10. Digital Advertising Market in India

Digital advertising refers to paid promotional communication delivered through digital channels. The Indian digital advertising market has expanded with internet access, smartphones, social media, online video, search, e-commerce and measurable advertising technologies.

Major digital advertising categories

- **Search advertising:** Paid ads shown around search results based on keywords and user intent.
- **Social media advertising:** Paid ads delivered through social platforms using audience targeting.
- **Display advertising:** Banner, native and other visual ads across websites and apps.
- **Video advertising:** Promotional messages delivered within or around online video content.
- **Mobile advertising:** Ads designed for mobile devices and applications.
- **Programmatic advertising:** Technology-assisted buying and delivery of digital ad inventory.
- **Influencer/creator advertising:** Brands collaborate with creators to reach engaged communities.

Factors influencing digital advertising growth

- Growing digital audience and smartphone usage.
- Increasing online shopping and digital transactions.
- Precise targeting and measurable outcomes.
- Growth of video and creator ecosystems.
- Expansion of regional-language content.
- Improved digital advertising technology and analytics.

11. Skills in Digital Marketing

A digital marketer needs a combination of **technical, analytical, creative and communication skills**.

Skill	Why it matters
SEO fundamentals	Helps improve organic visibility and understand search behaviour.
Paid advertising	Helps plan, launch and optimize PPC/social campaigns.
Content writing	Creates clear, persuasive and useful digital content.
Social media	Supports community building, engagement and paid promotion.
Analytics	Converts campaign data into insights and decisions.
Email marketing	Supports lead nurturing, retention and direct communication.
Design basics	Helps create effective visual creatives and understand layout.
Communication	Important for customers, teams, agencies and stakeholders.
Strategic thinking	Connects individual activities to business objectives.
Adaptability	Digital platforms, algorithms and user behaviour change frequently.

12. Digital Marketing Plan

A digital marketing plan is a written roadmap translating strategy into specific actions, timelines, budgets and measures.

Recommended structure

1. **Business situation:** Current position, product/service, competitors and digital presence.
2. **SMART objectives:** Specific, measurable, achievable, relevant and time-bound goals.
3. **Audience/persona:** Define customer characteristics, needs, problems and digital behaviour.
4. **Channel plan:** Select suitable channels and explain their roles.
5. **Content plan:** Topics, formats, platforms, frequency and content owners.
6. **Campaign plan:** Offer, creative idea, audience, budget and duration.
7. **Conversion path:** Explain what happens from ad/click to landing page to desired action.
8. **Budget:** Media spend, tools, production and human resources.
9. **KPIs:** Select metrics that directly relate to objectives.
10. **Calendar:** Schedule campaigns, content and reviews.
11. **Optimization:** Test creatives, audiences, landing pages and offers; learn from results.
12. **Reporting:** Present performance, insights and next actions.

Example: Digital marketing plan for a college event

Element	Example
Objective	Generate 500 registrations in 30 days
Audience	College students aged 18–24 in the target region
Channels	Instagram, YouTube Shorts, search, email/WhatsApp communication
Content	Speaker clips, event benefits, countdown posts, testimonials
CTA	Register Now
KPIs	Reach, video views, link clicks, registration conversion rate, cost per registration

Element	Example
Optimization	Compare creatives and audience segments; shift budget toward better-performing combinations

Unit 1 – Quick revision
Remember the flow: Fundamentals → Significance → Traditional vs Digital → Evolution → Landscape → Drivers → Indian Digital Users → Strategy → Consumer Journey → Digital Advertising → Skills → Digital Marketing Plan.

Unit 1 – Important Examination Questions

1. Define Digital Marketing. Explain its significance.
2. Differentiate between Traditional Marketing and Digital Marketing.
3. Explain the evolution of Digital Marketing.
4. Explain the Digital Marketing Landscape with its major components.
5. Discuss the key drivers of Digital Marketing.
6. Explain the characteristics of digital users in India and their importance to marketers.
7. Explain the steps/elements of a Digital Marketing Strategy.
8. Explain the Consumer Decision Journey with suitable digital touchpoints.
9. Explain the major forms of Digital Advertising in India.
10. Discuss the important skills required for a Digital Marketer.
11. Explain the structure of a Digital Marketing Plan with an example.

UNIT 2 – DIGITAL MARKETING TERMINOLOGY

Syllabus coverage
Terminology used in Digital Marketing; PPC and online marketing through social media; Social Media Marketing; Google Webmaster and analytics overview; Email Marketing; Mobile Marketing; Display Advertising; Buying Models; Different types of ad tools; Display advertising terminology; Types of display ads; Different ad formats.

1. Essential Digital Marketing Terminology

Term	Meaning
Impression	One instance of an advertisement/content being displayed to a user.
Reach	Number of unique users/accounts exposed to content or an advertisement.
Engagement	User interactions such as likes, comments, shares, saves, clicks or other actions.
Click	A user action in which an ad or link is selected.
CTR	Click-through rate: percentage of impressions that resulted in clicks.
Conversion	A desired action completed by a user, such as purchase, registration or enquiry.
Conversion Rate	Percentage of relevant visitors/clicks/users who complete the desired conversion.
CPC	Cost per click: amount paid or incurred for each click in a paid campaign.
CPM	Cost per thousand impressions.
CPA	Cost per acquisition/action: cost associated with generating a specified conversion/action.
CPL	Cost per lead: cost associated with generating a lead.
ROAS	Return on ad spend: revenue attributed to advertising divided by advertising spend.
Landing Page	A focused web page designed to receive campaign traffic and encourage a desired action.
CTA	Call to Action, such as Buy Now, Register, Download or Learn More.
Keyword	A word or phrase used to describe a search query or targeting theme.
Organic	Unpaid visibility or traffic generated through non-advertising methods.
Paid Media	Exposure obtained by paying a platform/publisher for advertising.
Owned Media	Digital properties controlled by the organization, such as its website, app or email list.
Earned Media	Exposure gained through others, such as reviews, shares, mentions or publicity.

2. PPC – Pay Per Click

Definition: PPC is an online advertising model in which the advertiser generally pays when a user clicks on the advertisement. Search advertising is a common PPC application, although click-based advertising can exist across different platforms.

How PPC works – simplified

Step	Process
1	Advertiser defines objective, audience, budget and campaign.
2	Relevant keywords/audiences and ad creatives are selected.
3	User performs a search or enters an environment where an ad can be shown.

Step	Process
4	The advertising system determines eligible ads and delivery.
5	User sees the ad and may click it.
6	User lands on a relevant page and may convert.
7	Advertiser measures clicks, conversions and cost, then optimizes.

Important PPC metrics

- **CTR = Clicks ÷ Impressions × 100**
- **Average CPC = Cost ÷ Clicks**
- **Conversion Rate = Conversions ÷ relevant visits/clicks × 100**
- **CPA = Cost ÷ Conversions**
- **ROAS = Attributed Revenue ÷ Ad Spend**

Advantages of PPC

- Can generate targeted traffic quickly.
- Budget and bids can be controlled.
- Performance can be measured.
- Campaigns can target keywords, audiences, locations and other criteria depending on the platform.
- Ads and landing pages can be tested and optimized.

Limitations of PPC

- Traffic generally stops when paid promotion stops.
- Poor targeting or irrelevant landing pages can waste budget.
- Competitive keywords/audiences may be expensive.
- Requires continuous monitoring and optimization.

3. Online Marketing Through Social Media

Online marketing through social media means using social platforms to create awareness, distribute content, engage audiences, build communities, generate traffic and run paid advertising.

Major activities

- Create and publish useful content.
- Engage with comments and messages.
- Build communities around a brand or topic.
- Use hashtags, trends and platform-native formats appropriately.
- Collaborate with creators/influencers where relevant.
- Run paid social campaigns.
- Monitor brand mentions and audience sentiment.
- Track reach, engagement, traffic, leads and conversions.

4. Social Media Marketing (SMM)

Social Media Marketing is the planned use of social media platforms to achieve marketing objectives. It combines organic activities and paid advertising.

Organic Social	Paid Social
Unpaid posts/content	Sponsored advertisements
Focus on community and long-term presence	Focus can include reach, traffic, leads, sales or app actions
Growth depends on content, audience interaction and platform distribution	Distribution can be controlled using paid targeting and budget
Useful for brand personality and relationship building	Useful for scalable campaign delivery and measurable acquisition

Basic SMM process

1. Set objective.
2. Identify target audience.
3. Choose appropriate platform(s).
4. Create content pillars and formats.
5. Prepare content calendar.
6. Publish and engage.
7. Run paid campaigns when required.
8. Measure results and optimize.

5. Google Webmaster / Google Search Console

Google Search Console is a service that helps website owners understand how their site performs in Google Search and identify certain technical/search visibility issues. It is commonly discussed in digital marketing under the earlier term **Google Webmaster Tools**.

Important uses

- Monitor search performance such as queries, clicks and impressions.
- Understand which pages receive search traffic.
- Inspect URLs and identify indexing-related information.
- Submit or monitor sitemaps where appropriate.
- Review certain search experience and technical reports.
- Identify issues affecting search visibility and website health.

> **Teaching distinction**
> **Search Console:** mainly helps understand website performance and search visibility.
> **Analytics:** mainly helps understand user behaviour and interactions on the website/app after users arrive.
> They complement each other rather than being identical tools.

6. Analytics Overview

Digital analytics is the systematic collection, measurement and analysis of digital data to understand user behaviour and evaluate marketing performance.

Analytics cycle

Collect data → Organize → Analyze → Find insights → Take action → Measure again

Common metrics

Metric	What it tells the marketer
Users/Visitors	Approximate audience interacting with a website/app during a period.
Sessions/Visits	Groups of interactions during a period, depending on the analytics system.
Page views	Number of page-view events.
Traffic source	Where users came from, such as search, social, referral, email or direct.
Engagement	How actively users interact with content/site/app.
Conversion	Whether users completed a desired action.
Revenue	Commercial value generated/attributed under the measurement model.

Analytics should answer business questions. For example: Which campaign generated the most qualified leads? Which landing page converts better? Where do users leave the conversion process?

7. Email Marketing

Email marketing is the use of email to communicate with prospects or customers for purposes such as awareness, lead nurturing, sales, onboarding, retention and relationship building.

Types of email communication

- **Promotional:** Offers, launches, discounts and product campaigns.
- **Transactional:** Order confirmations, receipts, account notifications and similar service messages.
- **Nurture:** Educational or relationship-building messages sent over time.
- **Newsletter:** Regular curated information, updates or content.
- **Lifecycle/automation:** Messages triggered by actions or stages in the customer relationship.

Important email metrics

Metric	Meaning
Delivery rate	Proportion of sent emails that are successfully delivered.
Open rate	Percentage of delivered emails reported as opened; interpretation can be affected by technical measurement limitations.
CTR	Percentage of recipients/delivered emails that generated clicks, depending on the reporting definition.
Conversion rate	Percentage completing the desired action after the email/click.
Unsubscribe rate	Percentage of recipients who unsubscribe.
Bounce rate	Percentage of emails that could not be delivered.

Good email practices

- Use permission-based lists and follow applicable laws/policies.
- Use clear subject lines and useful content.
- Segment audiences when relevant.
- Include a clear CTA.
- Optimize for mobile screens.
- Test subject lines, content and send times where appropriate.
- Monitor delivery, engagement and conversions.

8. Mobile Marketing

Mobile marketing refers to marketing activities designed for mobile devices such as smartphones and tablets.

Forms of mobile marketing

- SMS marketing
- Mobile-friendly websites and landing pages
- Mobile applications and in-app marketing
- Push notifications
- Mobile search and social advertising
- Location-aware marketing where appropriate and permitted

Why mobile matters

- Users carry smartphones throughout the day.
- Mobile enables quick interaction and action.
- Apps can support personalized experiences.
- Mobile-friendly design improves usability and conversion.

9. Display Advertising

Display advertising uses visual digital ad placements on websites, apps or digital content environments. Formats can include banners, responsive ads, native-style placements and rich media.

Display advertising objectives

- Build brand awareness.
- Reach relevant audiences.
- Drive website traffic.
- Support consideration and remarketing.
- Generate conversions where the campaign is designed for performance.

10. Display Advertising Buying Models

Model	Meaning / use
CPM	Cost per thousand impressions. Common for awareness/reach-oriented inventory.
CPC	Cost per click. Payment/cost is linked to clicks under the buying arrangement.
CPA	Cost per acquisition/action. Useful when the buying arrangement is tied to a defined conversion.
CPL	Cost per lead. Used when lead generation is the desired outcome.
CPV	Cost per view. Commonly associated with video/view-based advertising arrangements.
Flat rate / sponsorship	A negotiated fixed fee for a placement, period or package.

The availability and exact meaning of a buying model can vary by platform, publisher and campaign agreement. Students should explain the model according to the context given in the question.

11. Different Types of Ad Tools

Ad tools are platforms or systems that help marketers create, manage, target, deliver, measure or optimize advertising campaigns.

Tool category	Purpose
Search advertising platforms	Create and manage ads that can appear around search results.
Social advertising platforms	Create paid campaigns for audiences on social networks.
Display ad platforms/networks	Distribute visual ads across participating websites/apps.
Ad servers	Help manage, deliver and measure digital advertisements.
Demand-side platforms (DSPs)	Technology used by advertisers/agencies to buy digital ad inventory programmatically.
Analytics tools	Measure traffic, behaviour, conversions and campaign outcomes.
Tag/measurement tools	Help manage tracking and measurement implementations.

12. Display Advertising Terminology

Term	Definition
Ad inventory	Available space/opportunities where advertisements can be displayed.
Publisher	Organization/site/app owner that provides content and may sell ad inventory.
Advertiser	Business or organization paying for promotional exposure.
Creative	The actual advertisement asset, such as an image, HTML5 unit or video.
Banner	A common visual display advertisement placed in a defined area.
Native ad	An ad designed to fit the form/function of the surrounding content or platform.
Rich media	Interactive or enhanced ad creative that can include animation, video or user interaction.
Frequency	Number of times a user is exposed to an ad during a defined period.
Frequency capping	A control intended to limit how often a user sees an ad.
Viewability	Whether an ad had an opportunity to be seen according to a measurement standard.
Remarketing/retargeting	Showing relevant ads to users based on prior interactions, subject to platform rules and privacy requirements.
Click tracker	Mechanism used to record ad clicks for measurement/attribution.
Landing page	Page to which the user is directed after interacting with an ad.
CTA	Prompt encouraging a desired action.

13. Types of Display Ads

- **Static banner:** Fixed image-based creative.
- **Animated display ad:** Uses motion/animation to attract attention.
- **Rich media ad:** Provides interactive or multimedia functionality.
- **Responsive display ad:** Creative elements can adapt to available ad spaces depending on the platform.
- **Native display-style placement:** Designed to match the visual style of surrounding content while remaining identifiable as advertising.
- **Video display placement:** Uses video as the primary creative format.
- **Interstitial:** Full-screen or prominent ad shown at a transition point, especially in mobile/app environments.

14. Different Ad Formats

Format	Typical characteristic
Text ad	Primarily text-based promotional message.
Image ad	Static visual creative with copy/branding.
Carousel	Multiple cards/images that users can browse.
Video ad	Motion-based storytelling and demonstration.
Interactive/rich media	Encourages interaction within or through the ad.
Native format	Designed to resemble the surrounding content experience while being labelled as advertising.
Responsive format	System/platform can adapt assets to different placements.

15. Key Formulas for Unit 2

Metric	Formula
CTR	(Clicks ÷ Impressions) × 100
CPC	Cost ÷ Clicks
CPM	(Cost ÷ Impressions) × 1000
Conversion Rate	(Conversions ÷ relevant clicks/visits/users) × 100
CPA	Cost ÷ Conversions
CPL	Cost ÷ Leads
ROAS	Attributed Revenue ÷ Ad Spend

Small numerical example
Suppose a campaign receives 10,000 impressions and 200 clicks. CTR = (200/10,000) × 100 = **2%**. If the campaign cost is ■4,000, CPC = ■4,000/200 = ■**20**. If 20 users convert, CPA = ■4,000/20 = ■**200**.

Unit 2 – Quick Revision

Core flow: Terminology → PPC → Social Media Marketing → Search Console → Analytics → Email → Mobile → Display → Buying Models → Ad Tools → Display Terms → Ad Types → Ad Formats.

Unit 2 – Important Examination Questions

1. Define PPC. Explain how PPC advertising works with advantages and limitations.
2. Explain online marketing through social media.
3. Define Social Media Marketing and explain its process.
4. Explain Google Webmaster Tools/Google Search Console and its uses.
5. Give an overview of digital analytics and important metrics.
6. Define Email Marketing. Explain its types, metrics and best practices.
7. Explain Mobile Marketing and its different forms.
8. Define Display Advertising and explain its objectives.
9. Explain different display advertising buying models.
10. Explain different types of digital advertising tools.
11. Define important display advertising terminology.

12 Explain types of display advertisements.

13 Explain different digital advertising formats.

14 Write and explain important digital marketing performance formulas.
